

Adriatic Vascular Summit **Preliminary Program**

Sunday, September 5, 2010

- 4:00 PM 6:30 PM **Registration Open**
- Monday, September 6, 2010

8:15 AM

- 7:00 AM 6:00 PM **Registration Open**
- 8:00 AM 8:15 AM **Opening Remarks**

Session I: The Latest Advances in Evaluation and Treatment of Patients with **Peripheral Arterial Disease**

- How Have Statins and Antiplatelet Agents Changed Medical Management of . Atherosclerotic Disease
- Noninvasive Testing of Peripheral Arterial Disease: When and How?
- Advanced Interventional Techniques for Crossing CTO
- The Latest Results with Drug Eluting Balloons for Treatment of Lower ٠ Extremity Ischemic Disease
- Comparison of the Results From the Most Recent SFA Trials: Zilver PTX, RESILIANT, FAST, DURABILITY, STRIDES and Others: Which Approach Will Prevail?
- Drug Eluting Stents Vs. Bare Metal Stents for Treatment of Infrapopliteal Arterial Disease: The Results of the DESTINY Trial
- At This Day and Age What Are Current Indications for Surgical Treatment of Lower Extremity Ischemia?
- New Concepts for Prevention of Restenosis: Nanotechnology, Improved Stent **Designs and Drug Elution**

Live Case Demonstration

9:35 AM

Monday, September 6, 2010 (continued)

10:30 AM	Session II: Contemporary Management of Carotid Artery Disease
	 The Latest CAS vs. CEA Clinical Trials Results: How Will this Affect Treatment of Patients With Carotid Stenosis?
	 The Results of ICSS Trial: Randomized Comparison of CAS vs. CEA in Symptomatic Patients
	 Flow Cessation and Hybrid (Cristalo) Stents: Current Results and Future Implications
	 How to Reduce the Risk of Embolization During CAS in Octogenarians and other High Risk Groups
	 Interventional Strategies for CAS Should Be Based on Anatomy and Lesion Characteristics
	 What Are the Most Important Steps to Avoid Complications During Carotid Artery Stenting
	What Has to Be Done to Make CAS Competitive with CEA?
12:00 PM	Session III: New Developments in Treatment of Abdominal Aortic Aneurysms
	The Influence of Medical Treatment of Aortic Aneurysms on the Outcomes
	 The Growth of EVAR Procedures vs. Open Repair: What Can We Expect in Future?
	The Latest Information on EVAR vs. Surgery For Ruptured AAA
	Randomized Percutaneous AAA Repair (PEVAR) Trial Using the Endologix
	IntuiTrak™ System and Abbott Prostar XL™ and Proglide™ Closure Devices
	 The Latest Results of the Endurant[™] EU Trial
	Innovative Techniques for Treatment of Type II Endoleak After EVAR

Monday, September 6, 2010 (continued)

1:30 PM - 4:30 PM CONCURRENT SESSIONS

1:30 PM	Session IV: Contemporary Management of Coronary Artery and Valvular Heart Disease and the Latest Results with Percutaneous Aortic Valve Procedures:
	Current Results with Balloon – Expandable Aortic Valve
	Current Results With Self-Expanding Aortic Valve
	 Percutaneous Mitral Valve Repair: Techniques and Results
	Current Status with Drug Eluting Stents
	New Antiplatelet Strategies
	Complex Case Presentations
1:30 PM	Industry Educational Luncheon Session: Advances in Endovascular Management of Occlusive and Aneurysmal Disease
1:30 PM	Industry Educational Luncheon Session: The Latest Advances in Endovascular Management of Varicose Veins and How to Techniques
2:45 PM	Session V: New Developments in Treatment of Thoracic Aortic Pathologies
	 The Latest Results of GErman Registry for Acute Aortic Dissection Type A (GERAADA)
	The Update on the VIRTUE Registry for Treatment of Acute, Sub-Acute and
	Expanding Chronic Aortic Type B Aortic Dissections with Valiant Stent Graft
	Hybrid Procedures for Aortic Arch Aneurysms: When and How?
	 Indications, Technique and Results with Aortic Wrapping During Hybrid
	Procedures for Treatment of Aortic Arch Aneurysms
	 Indications, Techniques and Results of Endovascular Treatment of
	Malperfusion Syndrome in Thoraco-Abdominal dissections
	The Latest Results of Adsorb Trial Comparing Medical Therapy with TEVAR
	for Uncomplicated Type B Aortic Dissection
	 Indications, Techniques and Results of Elephant Trunk Procedures for
	Treatment of Ascending Aortic and Arch Aneurysmal Disease

Tuesday, September 7, 2010

8:00 AM - 9:00 AM Session VI: Unresolved Issues in Treatment of Carotid Artery Disease (The Latest Results of Carotid Stent Trails, Future of CAS, Current Indications for CAS)

- Restenosis After CAS vs. After CEA: What Is the Incidence and What and Treatments?
- Is Medical Therapy Currently the Best Option for patients With Asymptomatic Carotid Artery Stenosis?
- Combined CEA And Coronary Revascularization Procedure: Surgical Strategies and Outcomes
- On the Basis of Recent Trials Who Are Not Good Candidates for CAS

DEBATE:

- The Case Against CAS: If I Would Have an 80% Asymptomatic Carotid Artery Stenosis I Would Chose CEA!
- The Case in Favor of CAS: If I Would Have an 80% Asymptomatic Carotid Artery Stenosis I Would Chose CAS

9:30 AM LIVE CASE DEMONSTRATION

10:00 AM -11:30 AM Session VII: Unresolved Issues in Treatment of Aneurysmal Disease (Results of Latest Clinical Trials, Treatment of Challenging Aortic Anatomy)

- Endovascular Treatment of Iliac Artery Aneurysms with Branch Endografts: Technique, Precautions and Outcomes
- Protecting Spinal Cord in Thoracic Aortic Aneurysm Surgery: Technique and Results
- Paraplegia and TEVAR: What Are the Predictors and How to Prevent it?
- Is Endovascular Treatment of Aortic Dissection in Marfan Syndrome Acceptable Procedure with Current Endografts?
- The Latest Advancements in EVAR With Excluder in Challenging Infrarenal Neck Anatomy
- Debranching of the Visceral and renal Arteries From the Ascending Aorta For Treatment of Thoraco-Abdominal Aneurysms: What Are the Advantages and what are the Outcomes?

Tuesday, September 7, 2010 (continued)

10:00 AM -11:30 AM	Session VII: Unresolved Issues in Treatment of Aneurysmal Disease (Results of Latest Clinical Trials, Treatment of Challenging Aortic Anatomy) (continued)
	 Peticoat Technique for Treatment of Type B Dissection: Indications and Outcome With the Advent of Branched Aortic Endografts Is There Still a Place for Fenestrated, Chimney and Snorkel Techniques
	The Update on the Medtronic VALOR II Trial for Treatment of Atherosclerotic Descending Thoracic Aortic Aneurysms
11:30 AM	Key Note Address: 20 th Anniversary of 1 st EVAR: Personal Recollections and Future Implications by Dr. Juan Parodi
12:30 PM - 4:30 PM	CONCURRENT SESSIONS
12:30 PM	Session VIII: Contemporary Management of Coronary Artery and Valvular Heart Disease and Challenging Case Presentations
	New Technologies for Coronary Occlusions
	Patient Selection and Technique for CTO
12:30 PM -1:30 PM	Industry Education Luncheon Session: Unresolved Issues in Endovascular Management of Aneurysmal Disease
12:30 PM -1:30 PM	Industry Education Luncheon Session: The Art of Access: Percutaneous EVAR And TEVAR: Techniques and Outcomes
12:30 PM -1:30 PM	Industry Education Luncheon Session: Symposium on Critical Limb Ischemia
	 Medical Management of CLI Novel Balloon Techniques: Cutting Balloon, Angiosculpt, Drug Eluting Balloons Bare Stents vs. Covered Stents vs. Heparin Coated Stents Atherectomy Devices CTO Devices and Techniques Infrapopliteal Interventions: Techniques and Results Subintimal Angioplasty: Indications, Techniques and Outcomes Comparison of the Results From the Most Recent SFA Trials

Tuesday, September 7, 2010 (continued)

1:50 PM - 4:30 PM Session IX, Continued: New Developments in Treatment of Aortic Pathologies

- Indications and Results With Left Thoracotomy for Surgical Treatment of Aortic Arch and Descending Thoracic Aortic Aneurysms
- Endovascular Treatment of Malignant Aortic Dissections: Indications and the Technique of the MAD REDEEM Concept
- Update on the Medtronic Captivia System for Valiant Thoracic Stent Graft
- Update on the Next Generation of Conformable GORE TAG
- Technical Tips on Endovascular Treatment of Aortic Coarctation
- EVAR For Treatment of Small AAA: The Results from CAESAR and Other Trials
- When is the Open Repair of Aortic Arch Aneurysms Still the Best Procedure?
- Long Term Results With VIABHAN Stent Graft for Treatment SFA Occlusive and Aneurysmal Disease
- Challenging Case presentations

Wednesday, September 8, 2010

8:00 AM

Session X, Continued: The Latest Advances of Treatment of Thoracic Aortic Aneurysms

- When to Consider the Elephant Trunk procedure and When Debranching and Endovascular Treatment for Aortic Arch Aneurysms?
- On the Basis of Recent Clinical Trials What Are the Indications for TEVAR in Patients with Type B Aortic Dissections?
- Treatment of Aortic Arch Aneurysms with Newest Generation Branched Endografts
- Techniques and Results of Insitu Fenestration During Endovascular Repair of Aortic Arch Aneurysms
- Endovascular Repair of Type A Aortic Dissection: Technique and Preliminary Results
- Mid Term Results From the TRAVIATA Registry: Treatment of Thoracic Aortic Disease with the Valiant Stent Graft

10:30 AM -12:00 PM Session XI: Controversies in Treatment of Venous Pathologies (Varicose Veins, Venous Malformations, Access Sites, Acute and Chronic DVT)

- Fundamentals in Creating Appropriate Dialysis Access Sites
- The Results With Heparin Bonded ePTFE Grafts for Hemodyalisis Access
- Thrombolysis and Thrombectomy for Lower Extremity DVT: Technique and Outcomes
- Indications and Results of PTA and Stenting for Lower Extremity Venous Conditions
- Indications, Techniques and Results of Thrombolysis and Thrombectomy for Hemodyalisis Access Sites
- Radiofrequency Endovenous Ablation: Technique and Outcomes
- Laser Endovenous Ablation: Techniques and Results
- Foam Sclerotherapy for Treatment of Saphenous Vein
- Incompetence: Indications, Potential problems and Outcomes
- The Results of Prospective Clinical trials Comparing Different Modalities for Treatment of Varicose Veins

AVS ENDS
