

INVITATION to Webinar

Generalised Pustular Psoriasis (GPP) – a serious rare disease and its treatment

Dear doctor,

We invite you to join **Prof. Peter Wolf** and **Prof. Lev Pavlovsky** for the educational Webinar on GPP and its treatment.

GPP is a rare autoinflammatory dermatologic condition characterised by widespread presentation of sterile pustules within a background of erythema on non-acral skin. Untreated flares can result in life threatening complications and treatment of GPP is challenging due to the paucity of evidence-based treatment options.

Time:

Tuesday, 6th of June 2023 | 16:00-17:00 | Central European Summertime (UTC+2)

Agenda:

16:00-16:05	Welcome and Introduction	
16:05-16:20	Pathophysiology, diagnosis and treatment of GPP	P. Wolf
16:20-16:35	Practical treatment experiences in GPP	L. Pavlovsky
16.35-17:00	Discussion	

Prof. Peter Wolf, MD

Peter Wolf, MD, is Professor of Dermatology and Chair of the Department of Dermatology at the Medical University Graz, Austria. Dr. Wolf has long-standing clinical and research interests in inflammatory skin diseases including GPP. He is the principal investigator of numerous previous and ongoing clinical trials investigating novel treatment strategies in skin diseases. As an active member of the PhD programme Molecular Medicine (MOLMED) of the Medical University of Graz his translational research group addresses mechanistic issues of dermatological treatments.

Prof. Lev Pavlovsky

Dr. Lev Pavlovsky, a Clinical Associate Professor of Dermatology at Tel Aviv University's Medical School in Israel, is the Director of the Psoriasis Treatment Service at Rabin Medical Center. With particular expertise in immunobiological treatments, he has led several international clinical trials and authored numerous scientific publications and book chapters. Dr. Pavlovsky also serves as a Councilor at the International Psoriasis Council and the National Representative in the SPIN network.
