WELCOME

The European Academy of Andrology (EAA) is the main organization dealing with the promotion of education in andrology in Europe. One of the many different educational activities of the EAA is the coordination of the EAA schools (male urogenital ultrasound, testis histology and pathology and genetics of male infertility). We are glad to announce the establishment of a new school called "EAA Budapest School".

The EAA Budapest School 2020 will be divided into two modules. The first module is Basic Clinical Andrology, aimed mostly at fellows in training at the EAA Centres, who would like to take the EAA Clinical Andrologist exam. This course is highly recommended to all clinicians who would like to take the EAA Clinical Andrologist exam. In addition to young fellows, we welcome all other clinicians who are interested in receiving an update on basic clinical andrology.

The second module is the "School on Androgens Therapy" which is open to a broader audience including andrologists, endocrinologists and urologists. It provides a comprehensive overview of all aspects of androgens therapy from puberty to aging male. Interdisciplinary round tables will provide an opportunity to exchange views concerning some of the controversial topics related to testosterone therapy.

Apart from providing a comprehensive update on the latest findings, this course will help in building up personal contacts with the faculty and colleagues in a friendly atmosphere.

The venue, Budapest, is one of the most fascinating cities in the world. It offers many cultural and culinary activities, which we hope you can take advantage of during your stage. We very much hope that the school will be of significant interest to andrologists, endocrinologists and urologists and would be very happy to welcome you in Budapest between 3-7 March 2020.

Csilla Krausz
EAA President
