The first NDT-Educational Webinar is available online!

Should we more extensively apply Ambulatory Blood Pressure Monitoring (ABPM) for the diagnosis and treatment of hypertension in dialysis patients? This is the question, which is discussed in the new NDT-Edu Webinar on NDT Polar Views. Follow the crisp debate on this important clinical problem by two leading investigators in the field, Rajiv Agarwal (USA, Indiana University) and Alain Jardine (UK, Glasgow).

Collaboration between ERA-EDTA and The Lancet

The ERA-EDTA is happy to announce a very interesting initiative and unique opportunity to have high quality papers on original researches on any aspect of kidney disease published in a special themed issue of The Lancet.

THE LANCET Priority will be given to randomised trials that advance the evidence base relevant to treatment of disease, but any studies that have the potential to change clinical practice are welcome. Authors of accepted publications will be invited to present their research at the Lancet-ERA-EDTA joint symposium during the 53rd ERA-EDTA congress that will be held in Vienna (Austria) on May 21–24, 2016.

Strategies on How to Ensure Affordable, High-Quality Renal Replacement Therapy (RRT) in the Future

The prevalence of chronic kidney disease is still increasing. The reasons are manifold: people are becoming older, and loss of renal function is also a symptom of old age. Yet demographic trends alone do not explain the upward trend in chronic kidney disease (CKD); other common causes of CKD are diabetes mellitus, hypertension, smoking, and obesity – and it is known that the prevalence of these conditions is still rising. In addition, survival of kidney patients becomes longer. Therefore experts suggest that the number of people with limited kidney function may still increase in the next decades.
