Advancing Nephrology Around the World

## ISN Education

### A look back at July 2015 and beyond...

At the midway point of 2015, *ISN Education* spent much of July putting forward and looking back at top content from the last 6 months.

First, *ISN Education* released top **Plenary Session presentations** from ISN's **World Congress of Nephrology 2015**. These were presented by renowned speakers with varying backgrounds in nephrology whose biographies you can [read here](#).

A collection of the most popular content from *ISN Education's Ask The Expert (ATE)* column was featured, with questions in top categories - AKI, Glomerular Disease, Global Nephrology and Hemodialysis - that incited questions, answers and discussion with our ATE expert panel.

*ISN Education* also held a second webinar in two-part series by **Prof. George Bakris** giving an **update on slowing CKD progression**. The **video webcast** of this webinar is available for those who missed the event, and is the highest viewed webinar in 2015.

*ISN Education* began a couple of new initiatives as the first step in generating content in languages other than English. Since April 2015, **one KI article a month has been translated into Spanish**. The **first webinar in Spanish** on "Challenges to improve CKD care in Latin America" will take place on September 4th 2015, presented by **Prof. Ana Cusumano**. Please [register here](#) for this webinar.

Finally, we invite you to have a look at the **top 6 content pieces** on *ISN Education* the first 6 months of 2015. Content spans from archived videos and e-learning modules to WCN 2015, CRRT and Ten Minute Update presentations.

**Enjoy *ISN Education*!**

Vivek Jha,  
Chair of the *ISN Education* Committee
