

26th SEMMELWEIS SYMPOSIUM NEW CHALLANGES IN MICROBIOLOGY

SEMMELWEIS EAV

Nagyvárad téri Elmi

November 9-10, 2017

Dear Colleagues,

In 2017, Semmelweis University, Faculty of General Medicine, Institute of Medical Microbiology together with Pasteur Scientific Research Group obtained right for organizing this event. Numerous scientific sessions will be held in collaboration with national and international partners. The most recent scientific results will be detailed in oral presentations and in posters for professionals, PhD students and for the interested audience.

The title of this year's Symposium is "New Challenges in Microbiology" where the scientific work of our Institute will be demonstrated in four sessions. The topics will include all the scientific work that have been conducted in our University and in national and international collaborations. The presentations will focus on antimicrobial resistance mechanisms in multidrug resistant bacteria, new strategies in antimicrobial therapy, methods of molecular diagnostics, role of human microbiome in health and in disease, novel viruses that have been discovered and their role in different diseases together with their immunmodulatory effect, antiviral therapy and prevention options will be also discussed.

Microbiology belongs undoubtedly to the classic applied sciences. All major scientist of microbiology and related scientific fields - Robert Koch, Louis Pasteur, Endre Hőgyes, Ignácz Semmelweis - more than 150 years ago made milestones and their discoveries are still valid in medicine. The technical improvements led to comprehensive knowledge of human and microbial genetics and helped the development of microbiology.

However, still nowadays there are lot of challenges in microbiology including pathogen and host interactions the exploration of microbial genomes, microbial mechanisms against immunreactions and the widespread emergence of multidrug resistant bacteria. The 26th Semmelweis Symposium this year can foster bacteriology and virology research in our University and strengthen national and international scientific collaborations.

We cordially invite you and your collegaues to the Semmelweis Symposium on the 9th and 10th of November 2017.

Budapest 24 March, 2017

Dr. Szabó Dóra Professor Semmelweis University Faculty of General Medicine Institute of Medical Microbiology Director

SEMMELWEIS SYMPOSIUM - NEW CHALLANGES IN MICROBIOLOGY

Conference Chair

Dóra Szabó MD, Professor and Chair Semmelweis University, Institute of Medical Microbiology Budapest, Nagyvárad tér 4. E-mail: symposium@semmelweis-univ.hu

Scientific Program Committee

Prof. Dóra Szabó Dr. Béla Kocsis Dr. Eszter Ostorházi Dr. Orsolya Dobay Dr. József Ongrádi Prof. Károly Nagy Valéria Kövesdi

Venue Semmelweis University - NET Nagyvárad tér 4. H-1094 Budapest, Hungary

Websites for further information http://semmelweis.hu/symposium

Congress Bureau

Expert-Quality Congress & Travel Agency Ltd. H-1052 Budapest, Kígyó utca 4-6. Márta Szalma Tel.: 0036 1 311 6687 Fax: 0036 1 383 7918 E-mail: congress@eqcongress.hu Website: http://www.eqcongress.hu

GENERAL INFORMATION

CONFERENCE LANGUAGE English

> Opening Ceremony 9 november 2017

ACCREDITATION The Semmelweis Symposium is accredited by GYOFTEX for 32 points. The OFTEX accreditation is in process.

Opening hours of the registration

 9 November, Wednesday
 09:00 - 18:00

 10 November, Thursday
 08:00 - 17:00

REGISTRATION

Participation at the 2017 Semmelweis Symposium is free of charge for all participants, however an online registration is required. In case of any further question relating registration, do not hesitate to contact the organizers at congress@eqcongress.hu email address.

Form at: semmelweis.hu/symposium/en/semmelweis-symposium-2017/registration

Deadline for on-line registration: 31 October 2017

ABSTRACT INSTRUCTIONS

Deadline for abstract submission is **30 August**, **2017** Posters a structured abstract of maximum 2500 characters (half A4 size page) in English should be submitted via the congress website at www.semmelweis.hu/symposium/en/semmelweis-symposium-2017/abstract-submission

You will be informed about the receipt and acceptance of your abstract in due course. Formal requirements

Abstracts must contain detailed information of the methods used and result according to the following layout: Objective, Method, Results and Conclusion. To submit a case report should not be articulate this way, fluent text is acceptable.

SE NET 2017. november 9-10.

9th November 2017

10.00 OPENING CEREMONY

10.15-13.00 Section I. Emerging viral infections

Éva Ádám

Institute of Medical Microbiology, Semmelweis University, Hungary The 50 years of adenovirus research in the Institute of Medical Microbiology

Dario Di Luca

University of Ferrara, Italy HHV-6 and inhibitory KIR2DL2 NK cell receptor

József Ongrádi

Institute of Medical Microbiology, Semmelweis University, Hungary In vitro studies on the immunomodulatory aspects of HHV-6 and HHV-7

Davide Abate

Unverstiy of Padova, Italy New challenges in CMV infections

Erwin Tschachler

Vienna, Austria The 35 years of HIV/AIDS – What next?

Károly Nagy

Institute of Medical Microbiology, Semmelweis University, Hungary Contribution of advanced molecular biology to the HIV surveillance in Hungary

13.00-14.00 Lunch

14.00-17:00

Anna-Bella Failloux Institut Pasteur, Paris, France New challanges in Arbo-Roboinfection

Zoltán Kis National Center for Epidemiology, Hungary The Ebola outbreak – is it over?

Orsolya Nagy

National Center for Epidemiology, Hungary Laboratory diagnosis of Zika virus

Mária Takács

National Center for Epidmeiology, Hungary Hepatitis B and C serotypes in Hungary

PRELIMINARY PROGRAM

László Rókusz

National Healthcare Services Center, Hungary The experience with the treatment of hepatitis C infection

Csaba Jeney

Institute of Medical Microbiology, Semmelweis University, Hungary The evolution of molecular diagnostic in HPV

18.00 Official Dinner

10th November 2017

Section II. The challenges of the multidrug resistant bacteria and new therapeutic approaches

8.00-10.40 Christian Giske Karolinska Institute, Stockholm, Sweden Global trends in the antimicrobial resistance Areg Totolian

Institut Pasteur, Saint Petersburg, Russia New challenges in Streptcoccus pyogenes infections

Béla Kocsis

Institute of Medical Microbiology, Semmelweis University, Hungary Multidrug resistant Gram-negative bacteria in Hungary

Ákos Tóth

National Center for Epidemiology, Hungary Multi-drug resistant Gram-positive bacteria in Hungary

Mark van der Linden

Germany

Global trends in the seroprevalence in Streptococus pneumoniae Orsolva Dobay

rsolya Dobay

Institute of Medical Microbiology, Semmelweis University, Hungary Pneumococci carried by healthy children in Hungary, 2009-2015

Endre Ludwig

Joined Saint Stephan and Saint Ladislaus Hospital-Clinic, Budapest, Hungary

Antibiotic therapy in the age of multiresistant bugs – a clinician's approach

SE NET 2017. november 9-10.

Miklós Füzi

Institute of Medical Microbiology, Semmelweis University, Hungary Dissimilar fitness associated with resistance to fluoroquinolones influences clonal dynamics of various multiresistant bacteria

10.40-11.00 Coffee break

11.00-13.00 Carl Kraus Raleigh-Durham, USA FDA Pathways to Antibiotic Approval

Ralf Hoffmann Leipzig, Germany The mechanims of the short proline-rich antimicrobial peptides

László Ötvös Temple University, Philadelphia, USA Are the peptid antibiotics the future?

Eszter Ostorházi Institute of Medical Microbiology, Semmelweis University, Hungary Experiences with the A3-APO

13.00-14.00 Lunch

14.00-17.00 Section III. The importance of the human microbiome

Sean Kennedy Institut Pasteur, Paris, France The bioinformatical analysis of the microbiome

Dóra Szabó

Institute of Medical Microbiology, Semmelweis University, Hungary The effect of the antibiotics on the microbiome

Zsolt Radák University of Physical Education, Hungary The sport and the microbiome

Krisztina Madách Semmelweis University, Hungary The role of the microbiome in the intensive care

Gábor Veres Semmelweis University, Hungary The role of microbiome in Chron's disease

Sándor Pongor Péter Pázmány Catholic University, Hungary The role of the horizontal gene transfer in the microbiome
