

REGISTRATION OPEN

The Cervical Spine Research Society European Section is proud to announce registration for its first all day Symposium to be held in Basel, Switzerland on September 24th, 2010. As a result of the positive experience with the Cadaver Courses in Barcelona; all extremely well rated by the participants; the idea for a new instructional and theoretical course was launched by Bernard Jeanneret, a distinguished member of the Board. This unique one day course features theoretical state of the art aspects on frequent cervical spine disorders discussed by experienced surgeons. The theoretical content will be accompanied by discussions of cases. Interaction with the participants, as always, is encouraged.

Please check our website at www.csrs-es.org for online registration and more information.
