Treatment of Cervical Spine Pathologies September 24, 2010

State of the Art Symposium organized by
the CSRS-European Section
Chairman: Prof. Bernhard Jeanneret

Dear friends and colleagues

One of the main priorities of the Cervical Spine Research Society (CSRS) is the education of colleagues. After having started with very successful anatomical courses, we now have created a new teaching module. In this one day symposium, experienced surgeons from all over Europe will give you an extensive overview of Surgery of the Cervical Spine in the year 2010.

We are confident, that this symposium will be interesting for surgeons and rheumatologists, for senior as well as for younger colleagues.

We look forward to welcoming you to Basel for a fascinating one day learning experience.

Prof. Bernhard Jeanneret / Chairman

Scientific Program

	Topic	Overview - Presentations	Time (minutes)	Speakers
09.00	Trauma	Trauma of the Upper Cervical	20	Carlos Villas
