Akk. pont: 6

Előadó: Prof. Kris Goethals,

Prof. dr. Kris Goethals is a forensic psychiatrist/psychotherapist and training director at Mental Health Care Westeljk Noord-Brabant in the Netherlands. He is director of the University Forensic Centre at the Antwerp University Hospital and a member of the steering group of the Collaborative Antwerp Psychiatric Research Institute (CAPRI) at the University of Antwerp, Belgium. He is a professor of forensic psychiatry at the Faculty of Medicine and Health Sciences at the same University.

Az oktatóprogram összefoglalója:

The course will provide the knowledge and research results about the risk of psychiatric patients of becoming violent and of becoming offenders with violent crimes. It will focus on the indicators of risk for violence and delinquency but also on the indicators of immediate threat and imminent aggression on wards and in outpatient settings. It will teach on how to develop a structure in the assessment and to come to a professional judgment on the severity and on the imminence of risk. It will also teach on risk formulation and risk communication among staff and outside of the clinicians' surroundings (relatives, police, courts, caretakers).It will address risk management, when to intervene and how, the methods of prevention and the long term guidance of risky patients.

Educational intentions/Course outcomes:

This course is intended to teach and train some of those skills and to provide knowledge about the risk of mentally disordered patients, and to make clinicians aware of the necessity to judge the danger of their patients not only to themselves (suicide and self mutilation) but also to others.
