Room C – Congress Center Hamburg, Germany

Leading the Way to Improved Life After Stroke

We are delighted to have gathered together an eminent, multidisciplinary, and regionally diverse faculty. The symposium will be didactic and interactive and will provide an opportunity to discuss the growing public health crisis of stroke, the knowledge being gained on long-term post-stroke outcomes through stroke registries, the role of sustained and evidence-based rehabilitation, and the key to optimal delivery of long-term post-stroke care.

SYMPOSIUM PROGRAMME

► Welcome and introductions

Dr. Bo Norrving
*Department of Neurology
Lund University
Lund, Sweden*

► Stroke prevalence and burden: a growing public health crisis

Dr. Geoffrey Donnan
*Director, Florey Neuroscience Institutes
University of Melbourne
Melbourne, Victoria, Australia*

► What do stroke registries tell us about life after stroke?

Dr. Bo Norrving
*Department of Neurology
Lund University
Lund, Sweden*

► Rehabilitation improves life after stroke

Dr. David Good
*Department of Neurology
Penn State Milton S. Hershey Medical Center
Hershey, Pennsylvania, United States of America*

► The key to delivering long-term stroke care and support

Dr. Marion Walker
*Department of Stroke Rehabilitation
University of Nottingham
Nottingham, United Kingdom*
