In the September of 1935 the 9th World Congress of Dermatology was organised by the HDS, the congress secretary was Istvan Rothman, the congress president was Lajos Nékám.

Aims of the society:

This is an organisation of natural and legal entities, who are involved in researches on dermato-venerology. The goal of this society is to develop dermato-venerology and cosmetic treatments, to enrich the scientific knowledge of the members, as well as to train the members in the fields of medical ethics. In order to reach its goals, the Hungarian Dermatological Society organises lectures, national and international conferences, publishes

a learned journal (Bőrgyógyászati és Venerológiai Szemle – in English: Journal of Hungarian Dermatology and STD) and other publications. An important aim of HDS is to maintain and improve good relationship with national and international societies.

Do you cooperate in research subjects with the DDG?

In 2009 the monography entitled "Geschichte der deutschsprachigen Dermatologie" was published, in which there is a chapter about the Hungarian dermatology. This chapter was written by Prof. Mátyás Baló-Banga and Prof. Lajos Kemény.

Besides, there is a German-Hungarian Dermatological Society (DUDG), which was founded 15 years ago, and in every two years it organises a conference. This year this conference will take place in Berlin. The German president of DUDG: Prof. Th. Ruzicka (München), the Hungarian president is Prof M. Baló-Banga.

Conferences:

The most important conference of HDS is the *Annual Meeting* in November/December each year since 1928.

HDS joins the *EuroMelanoma Day* every year, when doctors of our society are doing melanoma screening.

HDS also arranged conferences on the occasion of the Psoriasis World Day on the 29th of October.

Paediatric Dermatological Days are also organised regularly by HDS.

In every two years HDS organises a cosmetological conference.

Also in every two years the DUDG (German-Hungarian Dermatological Society) has an international congress.

Twice a year HDS organises professional training courses for the residents of the HDS.

Sections of the HDS:

Contact dermatitis section
Dermato-chirurgical section
Dermato-infectional section
Dermato-oncological section
Section of experimental dermatology
Paediatric dermatology section
Section of history of dermatology
Cosmetological section

Lymphoma section
Mycology section
German-Hungarian section
Photo-dermatological section
Psycho-dermatological section
Psoriasis section
Dermatoscopy section
Hidradenitis suppurativa section
Acne-rosacea section

Workgroup of the HDS:

Workgroup of the nurses

Professional organs:

Journal of Hungarian Dermatology and STD, web: www.derma.hu.

Do you support the apprenticeship?

The Board of Directors determines a financial frame every year, from which the presence of young dermatologists, residents on international conferences is supported. Traditionally, one conference is chosen every year, and all the financial frame is dedicated to support that conference. In this year the DUDG Conference is chosen by the Board, and young dermatologists and residents will be supported to take part in this conference.

Other supports: HDS awards the best dermatological study on the Contest of Scientific Research of Students in every Clinic, every year.

There are also special courses for residents, organised or supported by the HDS.

Do you maintain foundations?

There is one foundation supported by the HDS: Fekete Zoltán Foundation. It awards one young dermatologist every year.
