

Launching on July 15, 2021, "**Current Knowledge and Future Directions in Psoriasis**," is a [five-part series of global webinars](#) that will bring together IPC's cadre of experts from around the globe to cover essential topics in the field of psoriasis and provide an update on the current state of the disease, followed by presentations focusing on perspectives for the next five years.

The global webinar agendas are developed to provide practical information and to maximize interaction with the faculty. Through presentations and question and answer sessions, participants will obtain valuable information about psoriasis today and what we can expect in the future.

Webinar 1 | July 15, 2021

[Personalized medicine in psoriasis with a focus on stratification and biomarkers](#)

Webinar 2 | October 2021

Personalized medicine in psoriasis with a focus on registries, big data and artificial intelligence

Webinar 3 | January 2022

Immunology in the perspective of comorbidities and early intervention

Webinar 4 | March 2022

How do we organize our psoriasis clinics in the future?

Webinar 5 | May 2022

How to prepare for another pandemic
