## - ASK THE EXPERT WEBINAR -

### What is the role of GLP-1 RAs in the current landscape of incretin therapies for T2D?

**SAVE THE DATE: January 26, 2021, 4PM CET**

We are close to that time of the year when we all need a (screen) break, but education in endocrinology is our priority and we are working hard to start the new year with high-quality educational offerings.

For now, we invite you to save the date in your calendars to join an interactive discussion with the top experts in the field and explore the role of GLP-1 RAs in the current landscape of incretin therapies for type 2 diabetes.

During this webinar, Dr Abbas Raza (Pakistan), Dr Alvin Powers (USA), Dr David D'Alessio (USA), and Dr Boris Draznin (USA) will engage in an interactive case-based discussion around Diabetes Management, giving you the opportunity to ask your questions during a Meet the Expert virtual session.

After the webinar session, you will be invited to solve a CME-accredited case study on the [ISE Global Education Hub](#) to apply what you learned.

**Save the date, register today, and stay tuned for more information in the new year!**

# WEBINAR
